OBJECTIVE

A Driven Computer Science and Engineering Graduate with a passion for Software Development and Technology. Strong knowledge of Python, Django Framework, and Web Development, with experience in building scalable and efficient applications. Looking for an Entry-level Software roles to apply my skills, grow professionally, and contribute to creating innovative solutions. Strong understanding of Software Development Lifecycle(SDLC).

SKILLS

Programming Language:

- Python

Back-End Development:

- Django Framework
- REST APIs

Front-End & Web Technologies:

- HTML5, CSS3, JavaScript
- Libraries: React JS.

Database Management:

- MySQL

Development & Build Tools:

- Git, GitHub, Postman

IDEs & Code Editors:

- Jupyter Notebook, Visual Studio Code

Soft Skills:

- Team Leadership, Time Management, Effective Communication, Continuous Learning

EDUCATION

B.E. in Computer Science and Engineering – Data Science

Sai Vidya Institute of Technology – Bengaluru, Karnataka

CGPA: 8.7

2022 – 2026

Internships

Python Full Stack Developer Intern, Dhee Coding Lab

Ongoing

Technologies & Tools: Core Python, Django Framework, REST API, React.js, MySQL, Git, GitHub

- Pursuing a Python Full Stack Development Internship at Dhee Coding Lab, where I developed responsive user interfaces using **HTML, CSS, JavaScript, and React.js**.
- Building scalable backend services using **Core Python and Django Framework**. Gaining practical experience in designing REST APIs, debugging, and implementing real-world application features.

TrackAI Intern, IIsc Startup - Lab To Market Innovations Pvt. Ltd.

Oct'25 – Feb'26

Technologies & Tools: Python, AI, Machine Learning Concepts, Data Annotations, Technical Documentation.

- Contributed to AI-based railway technology projects under expert mentorship.
- Collaborated with cross-functional teams to analyse system workflows and technical requirements.
- Supported testing, analysis, and documentation of engineering solutions.
- Strengthened problem-solving, analytical, and professional collaboration skills in an R&D environment.

PROJECTS

Predictive Sales Analytics using Machine Learning Techniques

- **Technologies and Tools used:** Python, Pandas, NumPy, Google Colab, Power BI, Matplotlib, XGBoost.
- **Description:** Developed a machine learning-based sales forecasting system using the Big Mart dataset by applying data preprocessing, feature engineering, and predictive models such as XGBoost, Random Forest, Decision Tree, and LSTM. Evaluated model performance using R^2 , MAE, RMSE, and MAPE to provide accurate sales predictions and business insights.

SAMRAKSHANA – Secure IIOT Authentication and Monitoring System

- **Technologies and Tools used:** Python, IoT, Flask Framework, Rest API, ESP32 MC, DHT11 Sensor.
- **Description:** Developed a lightweight and secure IIoT monitoring system with token-based authentication, real-time anomaly detection, and DoS attack prevention using ESP32 and Flask. Implemented secure device communication, sensor data validation, and rate-limiting mechanisms to enhance IoT network security.
